Products

Almonds are one of the most popular types of nuts containing many health benefits. They are good for cardiovascular diseases, blood circulation, strengthening bones, protecting skin, digesting food, and controlling blood sugar levels . Large amounts of vitamin E, magnesium, and other elements such as copper, iron, and a variety of vitamins can be found in almonds. The height of almond tree is between 6 to 10 meters depending on the type of climate and soil fertility .

Almond tree has a very strong root that can penetrate vertically up to 3 meters into the soil, therefore, it can satisfy its water requirement if there is a lack of water. Almond can be harvested manually, mechanically or with a long stick after ripening. Fadak Trading Company is one of the largest companies in the production and export of high quality, and tasty almonds in the Middle East and this company offers the following products to customers around the world:

Mamai Almond

This type of almond includes: large kernel, thin skin, stretched appearance and high resistance to pests. Therefore, it's one of the best types of almonds produced in Fadak Company.

Moreover, this almond is popular because of nutrients and unsaturated fat.

Stone Almond

One of the most common types of almonds produced in Fadak Company is stone almond, it has a hard skin and does not break easily. This type of almond is used in different forms of salted, raw, and sliced. High resistance to dehydration, high amount of fat, pharmaceutical and cosmetic use are some specifications of this product to name a few.

Rabi Almond

Rabi almond produced in Fadak Company is very similar to Mamai almond , it's very popular and tasty and can be used raw, salty, and sliced. The skin of this almond is very hard. The consumption of almonds eliminates bad cholesterol, prevents cardiovascular diseases, and is very helpful for our body as it has a variety of nutrients, vitamins, and unsaturated cholesterol.

Mongha Almonds

Mongha or paper almond is also offered by Fadak Trading Company. This type of almond has a sweet and tasty kernel with a fragile skin. The benefits of paper almonds are as follows: They are very good for skin, hair, cardiovascular diseases and blood pressure due to the presence of vitamin E, as well as other vitamins and nutrients. This type of almond also helps hydrate the skin and maintain its moisture naturally.

White Almond

Fadak Trading Company produces and packs white almonds as well. This product is one of the popular almonds that has a high-quality and tasty kernel and is used raw, salty, and sliced. White almond like other types of almonds contains nutrients, protein, vitamins, fatty acids, calcium, iron, potassium, magnesium, and edible fiber. Moreover, almond consumption prevents cancer, hair loss, and osteoporosis and strengthens the skin.

Bitter Almond

Our other product is bitter almonds which are slightly smaller than sweet almonds and are mostly used as medicine rather than food. This type of almond is used to prepare a variety of masks, oils, and this product is used in combination with other products. In traditional medicine, bitter almonds are widely used in treatment and beauty. For example, bitter almond oil is used for joint pain, hair loss and thickening of eyebrows.

Packaging

Our products are packaged and offered according to the customer's order in 10 to 12 kg packages in special and firm carton boxes causing higher durability and maintaining the quality of almond kernels.
